E coreylang.dev@gmail.com

PROFILE

- Goes by middle name "Corey".
- Born February 5th, 1985.
- 16+ years of professional development and programming experience.

BIO

I enjoy working with new programming languages, design patterns and am continuously learning. Since I was 12 years of age I have always researched software and technology solutions to make business more efficient. When I am not at my computer, I spend time with my family which includes my daughter Athena.

SKILLS

I am confident I am able to read project specifications, and programming documentation to accomplish the goals set forth in any programming language or environment.

LAMP

COREY LANG

"Software Engineer"

DEVELOPMENT/PROGRAMMING EXPERIENCE

2025-2025 AFCA <https://afca.io>

(Lead/Senior Software Engineer)

- Designed and developed a Conversational AI voice system. [Linux, Apache, MySQL PHP]
- Designed and developed LAMS (Legal Aid Management) system that operates everyday business for legal companies. [Linux, Apache, MySQL, PHP, Javascript, jQuery]
- Set up and configured new compute virtual machines on GPC to serve LAMS. [cPanel, AlmaLinux]
- Lead a team of 4 developers. Code review and support.

2020-2025 Novatech <https://novatechautomation.com>

(Software Developer / Web Developer)

- Designed, developed, and maintained the Orion python, cherrypy, postgres sql web application. The web application configures and manages Orion product hardware servers. [Linux, Apache, Python, PostgreSQL, Cherrypy]
- Designed, developed, and maintained the Kronos satellite clock python, flask, web application. The web application configures and manages Kronos satellite hardware servers. [Linux, Apache, Python, PostgreSQL, Flask]
- Designed, developed, and maintained the NovaTech product support website. The website allowed for customers to sign in via email (or legacy username credentials) and download NovaTech firmware updates. [Linux, Docker, Apache, Univorn, Python, MySQL, Django]

2020-2020 The Lead Group <https://theleadgroup.com>

(Full Stack Developer/IT Team)

- This position was temporary, and the employment contract is now complete.
- Worked on Various PHP Laravel applications daily for the lead intake websites, and analytical applications. [Linux, Apache, MySQL, PHP]
- Extended and updated React JS applications for the lead intake websites. [ReactTS, ReactJS, Linux, MySQL, PHP]
- Completed various monthly IT tasks.
- Worked with JIRA to manage IT stories and tickets.

2011-2020 AFCA <https://afca.io>

(Lead/Senior Software Developer)

- Built and maintained systems that ran and operated for profit, and non-profit businesses in the law industry. [Linux, Apache, MySQL, PHP]
- Provided software technical support for all applications every week, everyday Monday thru Sunday.
- Provided onsite networking, and computer technical support when working in AFCA Houston TX office.

- In 2015 taught and trained paid interns at the AFCA Iowa State University (ISU) campus office in AMES, IA.
- Managed, and lead a team of 4 developers. Code review and support.

One of the primary systems initially built and maintained is called Legal Aid Management System (LAMS). It is built in PHP on top of the Codeigniter PHP framework. LAMS has many features, but its primary focus is to help with the daily operations of various law companies. LAMS server functions in PHP using various Google Cloud Platform services. Most data are stored in a MySQL database, though key stores are utilized such as Redis. Components of LAMS are built using C#, Javascript, Python, and Google Scripts. LAMS is private web application and can only be accessed by authorized devices.

Some of LAMS features include:

- Contact, and client data
- Client case data
- Manual payment and billing
- Automatic payment and billing
- User/Employee automatic time tracking
- Automatic document management
- Electronic document filing system
- Business, and Legal document drafting and generation
- Full VOIP call system
- Dynamic and robust client portal data entry
- User/Employee work queues
- Attorney consultations
- Various business reports
- Employee efficiency telemetry reports
- Many more...

Other applications built, and maintained while working at AFCA includes:

- Filemation – a standalone application to organize, and file documents in any cloud file repository such as Dropbox, Box, GDrive, etc... [Linux, Apache, MySQL PHP]
- TxLRS Lawyers – a standalone application that runs the Texas Lawyer Referral Service. (<https://txlrs.org>, and <https://txlrs-lawyers.org>) . [Linux, Apache, MySQL PHP]
- Sign Pen Free – a standalone application used to sign documents electronically similar to applications such as DocuSign, or HelloSign. SPF's UI is built using React JS, and the backend API built in PHP on top of the Laravel PHP Framework. [Linux, Apache, MySQL PHP]
-

2009-2011 Angell EYE <https://angelleye.com>

(Lead Developer/Project Manager)

- Developed on numerous software applications, even older applications built with FileMaker Pro.
- Specialized in payment integrations and worked closely with PayPal.
- Performed many roles such as software developer, project manager, and business accounting.
- Managed and lead a team of 4 developers. Code review and support.
- Tested and attained Certified PayPal Developer certification.

2010-2011 Service Backpack

(co-owner)

Service Backpack was a SaaS Invoice application. SBP was LLC formed with one other person. Developed the SBP invoice application at night and weekends when I was not working on Angell EYE projects.

2002-2009 Freelance/Contract Development

Developed and designed various website, and web applications utilizing HTML, CSS, CGI-Perl, PHP, .NET, SQL, and Java from 2002-2009.

In 2000-2003 was a team leader, and lead developer for the first Shawnee Mission Northwest HS website.

1998-2001 NEXUZ

CEO/founder

The Nexuz IRC Network was an IRC Social Network created in 1998. The Nexuz team grew to 30-40 volunteers to help maintain and run the network. Worked with C, and C++ socket connection-based daemons, and unix based operating systems. Nexuz used BSD and Linux dedicated servers to run all servers. Nexuz peaked at 2k+ consistent users.

1997-1998 Personal Projects

Worked with Microsoft VB 3, and Microsoft VB 4 to develop Windows 95 programs which communicated with the America Online (AOL) instant messenger API.

EDUCATION

2010 PayPal Certified Developer

2003-2005 Johnson County Community College (JCCC) – studied computer engineering

1999-2003 Shawnee Mission Northwest High School
